HIGH CRI LED FLEXI STRIP

High CRI LED Flexi Strip - Hybrid Colour
Full Colour Gamut

FEATURES

- 12mm width flexible PCB with adhesive backing
- 5m length per roll
- 95 CRI, 2700K / 6500K
- R / G / B
- 24V constant voltage compatible
- Cuttable every 6 LEDs (100mm)

DESCRIPTION

YUJILED® high CRI LED flexible strips are extremely versatile and can be installed in a variety of linear and curved surfaces alike. Enhanced copper traces with precision SMT resistors provide consistently high power and brightness. 3M® adhesive backing allows for quick installation.

NOTES

Intensities (Iv) and colour shades of white (X-Y co-ordinates) may vary between LEDs within a batch. All LED components are supplied in anti-static packaging.

*Unless otherwise noted, specifications are based on a 1 metre segment.

**CCT range is tested under Yuji Everfine standard equipment which shall prevail, CIE1931 chromaticity coordinate tolerance ±0.0015 as reference.

ADDITIONAL NOTES

SELECTING A POWER SUPPLY

The wattage/ampere requirement is directly proportional to the length of LED flexible strip installed. Calculate the power requirement by multiplying the total length in metres by the maximum wattage or ampere per metre. For additional power supply stability, we recommend specifying 25% additional power capacity above the requirement. For example, a 5 metre length would require 5 metres x 18 W / metre = 90W; for power supply stability, we would recommend a power supply that is capable of supplying at least W (90W + 25% x 90W).

DIMMING

Our LED flex strips are compatible with 1-10V and PWM dimming systems.
